

Aman Singh Chauhan

amanchauhan10a@gmail.com | (+91) 85284 08664 | github.com/AmanInAction | linkedin.com/aman-chauhan

SKILLS

Languages: Java, C, C++, Python, JavaScript, TypeScript

Frontend: HTML, CSS, React.js, Next.js

Backend & Database: Node.js, Express.js, MongoDB, Socket.io

AI & ML: Python, NumPy, Pandas, Scikit-learn, XGBoost, Matplotlib, Seaborn

EDUCATION

Galgotias College of Engineering and Technology, Greater Noida

B.Tech, CSE(AI-ML)

2024 – 2028

CGPA: 8.20

Modern Academy, Gomti Nagar, Lucknow

Class XII, CISCE Board

2022 – 2023

91.25%

PROJECTS

Wanderlust | *Node.js, Express.js, MongoDB, EJS*

- Full-stack holiday rental platform where hosts can list properties with photos, pricing, and amenities, and guests can browse and book stays.
- Implemented user authentication with session management, and CRUD operations for property listings with image upload support.
- Designed RESTful APIs and applied MVC architecture to ensure a scalable, maintainable code structure.

FaceLink | *WebRTC, Node.js, Socket.io, JavaScript*

- Browser-based video conferencing application supporting real-time audio, video, and screen sharing for multiple participants simultaneously.
- Used WebRTC for peer-to-peer media streaming and Socket.io for signaling, room creation, and session management.
- Built dynamic UI controls for toggling audio and video, sharing screens, and gracefully ending calls.

HatchHub | *React.js, Node.js, Express.js, MongoDB, Socket.io*

- Professional networking platform with user profiles, posts, likes, comments, and a LinkedIn-style connection system.
- Implemented real-time one-on-one messaging using Socket.io with full conversation history stored in MongoDB.
- Built a dynamic feed surfacing posts from connections, secured with JWT-based authentication and protected API routes.

INTERNSHIP

Machine Learning Intern — Placemantra

Mar 2025 – May 2025

- Developed and deployed an Online Payment Fraud Detection system leveraging an **XGBoost Classifier**, processing over **6.3 million** financial transactions. Achieved **~99.96%** accuracy and an impressive ROC-AUC score of **~0.963 (test set) / ~0.969 (training set)**, significantly enhancing fraud detection capabilities.
- Conducted comprehensive **Exploratory Data Analysis (EDA)** using Pandas, Matplotlib, and Seaborn to uncover critical fraud distribution patterns across various transaction types, analyze balance shifts, and identify temporal trends.
- Engineered two impactful custom features (**balanceDiffOrig**, **balanceDiffDest**) to enhance model discriminative power; preprocessed categorical variables with Label Encoding and strategically split the dataset (**70/30**) for robust model training and unbiased evaluation.

ACHIEVEMENTS

- **LeetCode:** Earned the 50 Days Badge 2025 and solved 250+ problems across data structures and algorithms.
